

Orangeburg County Mechanical Contractor's Affidavit

It shall be the responsibility of all Heating and Air contractors to insure the systems they install are in compliance with the current edition of the International Energy Conservation Code as adopted by the Building Code Council of South Carolina and Orangeburg County. It shall also be the responsibility of the HVAC contractor to insure the system installed meets or exceeds all required seer rating, and CFM loading as provided in the manual J or ASHRAE; as submitted to the office of Permitting Inspections during the plan review submittal process.

Proper CFM loading may be achieved by either providing dampers in all branch lines or proper duct design sizing as provide in manual D for residential applications. The HVAC contractor shall use Manual J, Manual D and Manual S for all residential applications to insure they have installed the most energy efficient, economical, and cost prohibitive system available for the consumer.

The contractor by signing below has agreed to the provisions as stated and will adhere to these guidelines without malice.
