## Background

The County of Orangeburg is seeking proposals from qualified vendors to provide a centralized Time and Attendance management system to record and track employee hours and work schedules of various departments throughout Orangeburg County. Orangeburg County currently employs approximately 750 hourly employees. Employees are required to fill out time sheets on a bi-weekly basis. The process of gathering the data varies throughout the County. Currently, all employees record their time worked onto their hardcopy timesheet signed by the employee. The supervisor also signs the timesheet after verifying employee time recorded. If a supervisor makes changes in an employee's recorded time they are required to initial it. The Payroll clerk keys the data into SunGard / HTE Payroll applications.

## Scope of Work

The vendor shall furnish all installation, implementation, labor, testing, training and materials necessary for the installation of an automated time and attendance system as described herein. The preferred system should make use of web technologies for reporting and administration to collect data from several different input sources, (1) biometric system (hand scan or finger print) to capture and record sign-in and sign-out times at the physical locations, (2) PC transactions but not to be limited to arrival and departure, (3) telephone, with a reliable and secure means of collecting and recoding time and attendance. In addition the system should be able to easily and effectively integrate with other Orangeburg County systems through APIs or some other automation mechanism.

For each function requirement, the vendor must indicate whether the proposed system will require customization in order to support a specific function. For each requirement that is not an existing capability, the vendor must indicate the cost to develop such capability or function. Please list on separate sheet not on Certified Bid Sheet.

## REQUIREMENTS/SPECIFICATIONS

### ➤ **Functional Requirements**

#### Automation Process

- Eliminate need to use a manual data entry system.
- Software that will automatically track employee working time.
- Provide supervisor with a user friendly review, sign-off process, the ability to input missed punches, planned vacations, sick time, and other PTO types.
- Employee transactions, whether originating from PC workstations or other Data Collection mediums, will be written out immediately to disk, without delay, and available in real-time for reviewing time worked.
- The system will have the ability to collect data from several different input sources.
- Initially the County will use three different input sources for data collection: 1) one biometric "Hand Punch" device for 100 people; 2) telephone entry for 118 people and 3) PC entry for 532 people.
- Biometric device should be tamper proof – They should have the ability to register and stored hand print templates locally, but should also permit access to there templates from a centralized repository.
- Allow for a standard work day to be set up and allow for deviations from standard work day.
- Allow for an automated procedure for corrections both pre-validation and post-validation and track history.
- Future needs may require additional sources for collecting data (i.e. proximity cards, card swipes). Software needs to be flexible enough to build on initial investment.

#### Reporting

- Provide efficient reporting tools that meet normal industry standards.(Optional-provide samples)
- The capability of producing a timesheet that employee can sign as verification of time worked.
- Provides the ability to track employee attendance and tardiness.
- Ability to do "ad hoc" reports as required by County

#### Interfaces

- Ability to provide employee time data for SunGard/HTE payroll package seamlessly.

## ➤ **Technical Requirements**

### Security:

- Detail security capabilities of Vendor's product.
- Multiple levels of user authority per employee.
- Biometric devices will use Hand Biometry by Recognition Systems for employee authentication.
- Telephone and PC input sources needs to use user authentication.

### Data/Input Sources

- Vendor will describe database, storage and system requirements for functions.
- Product supports data backup capability that can be completed daily.
- The system will be hosted on a County server. Detailed hardware/software requirements to run this system need to be provided.
- Detailed PC requirements for client machines to be provided.
- Detailed specifications for recommended Biometric Hand Punch and Telephone devices to be provided. Biometric device needs to be able to connect to standard UPS as a safeguard against power surges/outages.
- Provide data format for file export and import.

## ➤ **Installation and Training Requirements**

### Installation

- Vendor will document system and application configurations, user parameters, based upon best practices, to achieve optimal performance of their application.
- Provide for installation of software and biometric device.
- Ability to import employee information from current system.
- Vendor must furnish operating manuals within thirty (30 Days after Contract Award

### Training

- Provide initial training and documentation for users. Training must be on-site
- Provide training sessions (online) for remote users.
- Provide training following an upgrade.
- Training must be on-site

## ➤ **Technical and Maintenance Support Requirements**

### Support

- Vendor must be able to provide ongoing technical support as required by County
- Provide annual technical/software agreements and maintenance costs after first year. (The effective date of any maintenance service agreement will be the day following the date of the warranty period expiration.)
- Provide for upgrades as part of ongoing maintenance costs.
- Provide maintenance agreement/support for biometric device
- Provide sample maintenance agreements.

### Evaluation Criteria

RFP No. FY12-1014 Time and Attendance Software/Hardware

If Orangeburg County decides to go forward with the procurement, the award shall be made to the vendor whose request for proposal determines to be the most advantageous to the County taking into consideration the evaluation factors stated in this section. The evaluation shall be based in part on the County's review and/or verification of the Vendor Qualifications Responses. The factors to be considered in evaluating are as follows, and are listed in order of relative importance: (see note below)

Operational cost that the County would incur if the proposal is accepted;

Quality of the product or service, or its technical competency;

Reliability of delivery and implementation schedules;

Maximum facilitation of data exchanged and system integration;

Warranties, guarantees, and return policy;

Vendor financial stability;

Industry and program experience;

Prior record of vendor performance;

Vendor expertise with engagement of similar scope and complexity;

#### (Note)

The method of selection, Competitive Seal Proposals, does not require a numerical weighting for each factor. See Code §5-304.7.
